EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

DISTRICT.	Port of entry.	DISTRICT.	Port of entry.	DISTRICT.	Port of entry.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal-Commerce Expert.*

OCTOBER SUMMARY OF INTERNAL-TRADE MOVEMENTS.

The summary of Internal Commerce for October, 1909, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the ten months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collector of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

[a] Cleveland reported 25,378 lake coal cars for October, 1909.

[b] The Butte Terminal Association was superseded by the Montana Demurrage Bureau in May, 1908. The returns of the new bureau for October were 43,250 cars, and for the ten months ending October, 1909, 373,136 cars.

[c] Not reported.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for October and ten months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for October and ten months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

Commercial Movements of Live Stock at Interior Markets during October and Ten Months ending October, 1907–1909.

GRAIN MOVEMENT AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the Bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE OF THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of October and ten months ending with October. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of October transactions at 142 ports of receipt and 200 ports of shipment were reported. The number of vessels arriving in October was 8,512 and the departures numbered 8,470 vessels. The registered tonnage for the month was as follows: Arrivals 13,936,103 net tons; departures, 13,840,365 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, OCTOBER AND TEN MONTHS ENDING OCTOBER, 1907-1909.

A summary of the lake traffic for October, compared with the corresponding months in 1907 and 1908, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. October receipts in 1909, at all ports reporting were 11,799,353 net tons, compared with 9,872,578 net tons in October, 1908, and 11,549,561 net tons in October, 1907. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

[a] See note "a" to table on page 711.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in October consisted of the following: Receipts at Ashtabula, 9 net tons of unclassed freight; Chicago-South Chicago, 7,238 net tons unclassed freight; Conneaut, 20 net tons unclassed freight; Gladstone, 724 net tons unclassed freight; and Milwaukee, 2,854 net tons unclassed freight. Shipments from Ashtabula, 19 net tons unclassed freight; Chicago-South Chicago, 497 net tons flour, 1,130,881 bushels corn, and 5,018 net tons unclassed freight; Conneaut, 717 net tons iron manufactures and 309 net tons of soft coal; and Gladstone, 918 net tons flour and 1,610 net tons unclassed freight.

The total "in-transit" movement for October was 717 net tons iron manufactures, 309 net tons soft coal, 1,415 net tons flour, 1,130,881 bushels corn, and 17,492 net tons unclassed freight.

During October, 1909, there were inspected into vessels at Chicago, as reported by the municipal grain inspector, 4,418,772 bushels of grain, composed of 230,858 bushels wheat, 3,912,814 bushels corn, and 275,100 bushels oats. During October, 1908, there were inspected 4,142,885 bushels of grain, of which 979,093 bushels were wheat and 3,163,792 bushels were corn. During the season ending October, 1909, the total quantity of grain inspected before loading into vessels was 34,935,361 bushels as compared with 34,083,932 bushels during the same period in 1908.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during October and ten months ending October, 1907, 1908, and 1909. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During October vessels were supplied with fuel at these five ports to the amount of 341,505 tons, and for the ten months ending October, 3,283,089 tons.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years, to the end of October. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Black Warrior River for October, 1909, was at Lock No. 5, where 5,359 tons of freight passed, of which 60 tons were coal and 5,299 tons were miscellaneous merchandise.

The maximum tonnage on the Cumberland River for October, 1909, was at Lock No. 1, where 3,648 tons of freight passed, of which 232 tons were grain and 3,416 tons miscellaneous.

Upstream tonnage on the Kentucky River during October, 1909, was largest at Lock No. 1, where 3,429 tons of freight passed, of which 1,800 tons were coal and 1,629 tons were miscellaneous merchandise. Downstream tonnage at Lock No. 10 aggregated 2,688 tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 6,117 tons.

Upstream tonnage on the Muskingum River during October, 1909, was largest at Lock No. 10, where 980 tons of freight passed, of which 70 tons were coal and 910 tons miscellaneous merchandise. Downstream tonnage was largest at Lock No. 1, where 4,903 tons of freight passed, mostly merchandise. The grand total freight passing in both directions at locks of maximum tonnage was 5,883 tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 61,811 net tons mined in the first and second pools during October, makes a total coal traffic of 801,531 net tons for the river during October. Of other downstream freight, 16,240 tons of miscellaneous merchandise are to be added, making a total of 817,771 net tons in October. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For ten months ending with October the total movement was 9,537,608 net tons in 1909, 8,085,960 net tons in 1908, and 10,458,144 net tons in 1907. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in October amounted to 182,321 net tons.

The total freight moved in both directions on this basis of calculation was 1,000,092 net tons in October, 1909, as against 764,363 net tons in October, 1908, and 1,250,355 net tons in October, 1907.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the ten months ending October 31, 1909, of the vessels reported 1,978 were loaded with coal; 323 carried lumber, logs, piling, and wood; 107 carried ties; 506 carried merchandise; 52, rocks; 12, brick; 19, steel; 1, iron rails; 8, staves; 15, wire and nails; 2, cotton ties; 1, drainpipe; 4, wheat; and 1, sugar.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

PRODUCTION AND SHIPMENTS OF CONNELLSVILLE (PA.) COKE.

The following table presents figures of production and shipments of Connellsville coke from Connellsville proper and the so-called "Lower District," as reported in the weekly issues of the Connellsville Courier. The figures represent estimates of the Courier, verified by and combined with the actual tonnage figures of the local railways.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

MONTHLY SUMMARY

OF

COMMERCE AND FINANCE

OF THE

UNITED STATES

NOVEMBER, 1909

WASHINGTON
GOVERNMENT PRINTING OFFICE
1910

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, [illegible] pounds; malt, 34 pounds; Brazil nuts, 62 pouuds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

DISTRICT.	Port of entry.	DISTRICT.	Port of entry.	DISTRICT.	Port of entry.

TONNAGE MOVEMENT IN THE TRADE OF THE UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal-Commerce Expert.*

NOVEMBER SUMMARY OF INTERNAL-TRADE MOVEMENTS.

The summary of Internal Commerce for November, 1909, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the eleven months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commerical organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collector of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I, Commercial movements at interior centers; II, Coastwise commerce on the Great Lakes; III, Commerical movements at the North Atlantic seaboard; IV, Coastwise commerce at Atlantic and Gulf ports; V, Commerical movements in southern territory; and VI, Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII, Commerical movements on rivers and canals; VIII, Commercial movements of coal, coke, petroleum, and pig-iron production; IX, Ocean freight rates; and, X, Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

[b] The Butte Terminal Association was superseded by the Montana Demurrage Bureau in May, 1908. The returns of the new bureau for November were 44,139 cars, and for the eleven months ending November, 1909, 417,389 cars.

[c] Not reported.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for November and eleven months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for November and eleven months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENT AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the Bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of November and eleven months ending with November. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of November transactions at 151 ports of receipt and 178 ports of shipment were reported. The number of vessels arriving in November was 6,942 and the departures numbered 6,800 vessels. The registered tonnage for the month was as follows: Arrivals 11,666,660 net tons; departures, 11,373,282 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, NOVEMBER AND ELEVEN MONTHS ENDING NOVEMBER, 1907–1909.

A summary of the lake traffic for November, compared with the corresponding months in 1907 and 1908, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. November receipts in 1909, at all ports reporting were 9,897,648 net tons, compared with 8,369,675 net tons in November, 1908, and 9,125,889 net tons in November, 1907. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in November consisted of the following: Receipts at Ashtabula, 41 net tons of unclassed freight; Chicago-South Chicago, 8,342 net tons unclassed freight; Conneaut, 20 net tons flour and 20 net tons unclassed freight; Gladstone, 1,214 net tons unclassed freight; and Milwaukee, 2,808 net tons unclassed freight. Shipments from Ashtabula, 42 net tons unclassed freight; Chicago-South Chicago, 27 net tons iron manufactures; 160 net tons flour, 191,112 bushels corn, and 2,183 net tons unclassed freight; Conneaut, 276 net tons iron manufactures and 871 net tons of soft coal; and Gladstone, 1,144 net tons flour and 930 net tons unclassed freight.

The total "in-transit" movement for November was 303 net tons iron manufactures, 871 net tons soft coal, 1,324 net tons flour, 191,112 bushels corn, and 15,580 net tons unclassed freight.

During November, 1909, there were inspected into vessels at Chicago, as reported by the state grain inspector, 2,216,184 bushels of grain, composed of 227,296 bushels wheat, 1,929,108 bushels corn, and 59,780 bushels oats. During November, 1908, there were inspected 1,984,485 bushels of grain, of which 351,729 bushels were wheat, 1,532,756 bushels were corn, and 100,000 bushels were oats. During the season ending November, 1909, the total quantity of grain inspected before loading into vessels was 37,151,545 bushels, as compared with 36,068,417 bushels during the same period in 1908.

III.—COMMERCIAL MOVEMENTS AT THE NORTH ATLANTIC SEABOARD.

The territory covered by these movements includes the Atlantic coast south as far as Baltimore, Md. The operations reported include the receipts and shipments of live stock, flour, and grain for November and eleven months at the North Atlantic ports of Boston, New York, Philadelphia, and Baltimore, miscellaneous receipts at New York, and tobacco receipts and stocks at principal eastern markets.

Shipments of boots and shoes from Boston, as reported by the Shoe and Leather Reporter, of Boston, Mass., for the four weeks ending November 27, 1909, amounted to 324,854 cases, against 345,417 cases for four weeks in 1908. For the forty-seven weeks ending November 27, 1909, the shipments amounted to 3,874,603 cases, against 3,374,335 cases for the forty-seven weeks of 1908.

Fresh fish to the amount of 7,771,700 pounds were received at Boston during November, 1909, as compared with 6,114,100 pounds in November, 1908. At Gloucester the 1909 arrivals of fresh fish amounted to 3,274,500 pounds, and of salted fish 6,669,236 pounds. For November, 1908, corresponding totals were 3,112,297 pounds of fresh fish and 4,746,874 pounds of salted fish. The principal kinds received were cod, cusk, haddock, hake, pollock, and halibut.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during November and eleven months ending November, 1907, 1908, and 1909. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During November vessels were supplied with fuel at these five ports to the amount of 296,639 tons, and for the eleven months ending November, 3,579,728 tons.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years, to the end of November. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Big Sandy River for November, 1909, was at Lock No. 2, where 245 tons of freight passed, of which 99 tons were coal and 146 tons were miscellaneous merchandise.

The maximum tonnage on the Black Warrior River for November, 1909, was at Lock No. 5, where 5,352 tons of freight passed, of which 5,350 tons were logs and lumber and 2 tons were miscellaneous merchandise.

The maximum tonnage on the Cumberland River for November, 1909, was at Lock No. 2, where 2,253 tons of freight passed, all of which was miscellaneous.

Upstream tonnage on the Kentucky River during November, 1909, was largest at Lock No. 1, where 13,929 tons of freight passed, of which 13,800 tons were coal and 129 tons were miscellaneous merchandise. Downstream tonnage at Lock No. 8 aggregated 1,282 tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 15,211 tons.

Upstream tonnage on the Muskingum River during November, 1909, was largest at Lock No. 9, where 1,066 tons of freight passed, of which 156 tons were lumber and 910 tons miscellaneous merchandise. Downstream tonnage was largest at Lock No. 10, where 1,518 tons of freight passed, mostly merchandise. The grand total freight passing in both directions at locks of maximum tonnage was 2,584 tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 39,099 net tons mined in the first and second pools during November, makes a total coal traffic of 800,739 net tons for the river during November. Of other downstream freight, 12,516 tons of miscellaneous merchandise are to be added, making a total of 813,255 net tons in November. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For eleven months ending with November the total movement was 10,515,745 net tons in 1909, 8,837,893 net tons in 1908, and 11,605,648 net tons in 1907. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in November amounted to 164,882 net tons.

The total freight moved in both directions on this basis of calculation was 978,137 net tons in November, 1909, as against 751,933 net tons in November, 1908, and 1,147,504 net tons in November, 1907.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the eleven months ending November 30, 1909, of the vessels reported 1,982 were loaded with coal; 353 carried lumber, logs, piling, and wood; 107 carried ties; 545 carried merchandise; 52, rocks; 12, brick; 19, steel; 1, iron rails; 8, staves; 15, wire and nails; 2, cotton ties; 1, drainpipe; 4, wheat; and 1, sugar.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

STATEMENT OF VARIOUS PETROLEUM PIPE LINES FOR THE MONTH OF NOVEMBER, 1909.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

DISTRICT.	Port of entry.	DISTRICT.	Port of entry.	DISTRICT.	Port of entry.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

SUMMARY OF INTERNAL TRADE MOVEMENTS FOR DECEMBER AND THE CALENDAR YEAR 1909.

The summary of Internal Commerce for December, 1909, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the twelve months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collector of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I, Commercial movements at interior centers; II, Coastwise commerce on the Great Lakes; III, Commercial movements at the North Atlantic seaboard; IV, Coastwise commerce at Atlantic and Gulf ports; V, Commercial movements in southern territory; and VI, Commercial movements on the Pacific coast Other tables, representing no particular geographical sections, are: VII, Commercial movements on rivers and canals; VIII, Commercial movements of coal, coke, petroleum, and pig-iron production; IX, Changes in rail freight rates; X, Lake freight rates; XI, Ocean freight rates; and, XII, Building operations.

LIVE-STOCK AND GRAIN MOVEMENTS DURING 1909.

Live-stock receipts during December at seven primary markets, 3,349,113 head, fell over half a million head short of like receipts during December, 1908, when 3,888,685 head were reported. The shortage in the total is due primarily to the smaller receipts of hogs. Of the latter 1,661,087 head were reported for the month under consideration, as compared with 2,261,614 and 1,856,188 head received during December, 1908 and 1907. The inbound cattle movement for the month, 824,634 head, surpassed in volume both the like December, 1908 and 1907, movements, aggregating 727,022 and 638,106 head. The December receipts of calves, 49,298 head, were also heavier than for December of the two preceding years. The December arrivals of sheep, 791,735 head, were below the total reported the year before, though largely in excess of the December, 1907, total of 584,707 head. No appreciable differences, as compared with December, 1908, figures are shown in the receipts of horses and mules at these markets.

The aggregate live-stock receipts for the year at the seven leading interior markets, 39,545,725 head, were the lowest since 1904. The receipts of hogs at these markets, which during each of the four prior years had been in excess of 19 million head, totaling 22,863,701 head for the year 1908, fell to 18,834,641 head in 1909. The cattle receipts for the year, 9,189,312 head, while comparing favorably with the total for the previous year, 8,827,360 head, were below the like totals for each of the years 1905, 1906, and 1907. The annual receipts of calves, 871,472 head, exceeded like totals for each of the preceding four years. The 1909 arrivals of sheep, 10,284,905 head, while in excess of like totals for the two preceding years, show a smaller total than the figures for 1905 and 1906. The receipts of horses and mules, 365,395 in number, while above the total reported for the year before show, however, a large decrease when compared with the figures for the earlier years. The shortage, as compared with the 1908 figures, in the supply of hogs does not affect particularly any one of the markets considered. As compared with 1908 figures, receipts at Chicago, 7,033,647 head, show an absolute decrease of 1,627,074 head, or a decline of 19 per cent; those of Kansas City, 3,092,835 head, a minus of 622,274 head, or a decline of 17 per cent; those of Omaha an absolute decrease of 289,358 head, and a relative decline of 12 per cent. The largest per cent decrease is shown in the receipts of hogs at St. Joseph, the 1909 figures, 1,693,831 head, being 28 per cent below those reported the year before. St. Louis receipts for the year, 3,076,065 head, show a relatively small decline of less than 4 per cent from the 1908 total.

While the total number of cattle receipts at the seven primary markets was larger than the year before, the 1909 receipts of cattle at Chicago, 2,929,805 head, for the first time since 1902 fell below three millions, constituting less than 32 per cent of the total receipts at the seven primary markets, as compared with nearly 36 per cent—the average proportion for the preceding five years. Of the annual receipts of sheep, almost 43 per cent is credited to Chicago, though this percentage was slightly below the corresponding average for the preceding five-year period. Of the total annual receipts of calves at five primary markets, over 80 per cent was credited to Chicago

and Kansas City, the importance of the latter market apparently growing at the expense of Chicago. The largest market for horses and mules in the past year was St. Louis, which is credited with over 35 per cent of the total receipts at the seven most important markets, though its importance as the leading horse and mule market seems to have slightly decreased since earlier years.

The volume of traffic caused by the inbound live-stock movement is best measured by the number of loaded live-stock cars received at the seven markets in question. While this number is partly estimated, and therefore not absolutely accurate, a comparison of the 1909 total of 708,210 cars with those for the earlier years indicates a decrease in the supply since 1904; the 1909 figures being more than 4 per cent below the average for the preceding five years.

The December shipments of packing-house products from Chicago, 196,962,855 pounds, were lighter than during December of the preceding year, as well as of the years 1905 and 1906. The largest loss, as compared with the figures of earlier years, is shown in the shipments of lard and canned meats. The annual aggregate shipments of packing-house products from the same market, 2,151,663,713 pounds, were below those reported for any of the five previous years. All the items comprised in the grand total, with the exception of pickled beef and pork show large declines, as compared with the figures for the earlier years. The largest relative losses since 1905 appear under the head of canned meats, the loss amounting to about 70 per cent, and of lard, the shipments of which declined about 33 per cent since that year. These shortages may be partly accounted for by the smaller export demand for these articles, the exports of canned meats, for instance, showing a decline from 75.2 million pounds to 16.4 million pounds since 1905, while the exports of lard appear to have declined from 701.7 million pounds to 445.8 million pounds during the same period.

The annual eastward trunk-line movement of provisions from Chicago and Chicago-junction points shows a decline from 1,460,423 pounds in 1905 to 942,376 pounds for the past year. The stocks of meat, as reported for the five principal packing centers at the end of the year, 135,437,505 pounds, were below like figures reported under the same dates in each of the last five years.

The aggregate grain receipts during December at fifteen leading markets, 59,226,762 bushels, were below like December receipts during the last five years, the decrease affecting all the principal grains. The grain receipts at the same markets during the past year, 744,624,068 bushels, were lower than for any year since 1904. Of the total reported for the year 256,770,641 bushels was wheat, 215,919,510 corn, 185,005,336 oats, 78,616,648 barley, and 8,311,934 rye. The largest wheat receipts during the year are shown for Minneapolis, the markets next in order of importance being Duluth, Kansas City, Chicago, and St. Louis, these five markets taking about 85 per cent of the total commercial wheat supply reported for the fifteen markets. In the matter of corn, the importance of Chicago is preeminent, over 42 per cent of the article marketed at the fifteen centers having been received at that city. The other markets showing receipts of over 10 million bushels of corn for the year in the order of their magnitude were Omaha, St. Louis, Peoria, and Kansas City. The average proportion of Chicago receipts to the total corn receipts at the fifteen markets was above 44 per cent for the preceding five-year period.

The relative share of Chicago in the total commercial supply of oats is even larger, more than 47 per cent of the total received at fifteen important centers being credited to that city. The other markets whose annual receipts of oats exceeded 10 million bushels were St. Louis, Minneapolis, and Omaha. The receipts of barley appear to have been less concentrated, though aggregating at the four most important markets, viz, Chicago, Minneapolis, Milwaukee, and Duluth, almost 90 per cent of the total received at fourteen important markets. The principal markets for rye during the past year, in the matter of their importance, were Minneapolis, Chicago, and Milwaukee, these three cities taking over 56 per cent of the total received at fourteen principal interior markets.

The flaxseed movement during the year was lighter than in any of the preceding five years, Duluth and Minneapolis taking over 87 per cent of the total marketed at six important centers.

The December flour shipments from thirteen milling centers are given as 3,637,767 barrels, compared with 3,299,208 and 2,939,973 barrels reported for December, 1908 and 1907. The annual flour shipments from these thirteen cities are stated as 44,063,156 barrels, a quantity exceeding the like totals for any of the five preceding years. Minneapolis, Chicago, Duluth, Milwaukee, and St. Louis are credited with 83 per cent of the aggregate shipments for the year. The relative importance of these markets does not show any considerable change during the last five years. Minneapolis supplied about 35 per cent of the total shipments both during the past year and the preceding five-year period.

The aggregate grain and flour receipts during December at the four principal Atlantic seaboard cities, 20,813,870 bushels, fell below like receipts during December, 1908 and 1907, when 24,355,344 and 26,139,661 bushels were reported. All the cities except Baltimore share in the decline. The receipts for the past year, 178,190,501 bushels, show a heavy decline in the grain trade of these four cities since 1907 and 1908, when 256,348,876 and 203,707,813 bushels were reported. Since 1907 the Boston grain receipts declined about 30 per cent, New York receipts about 23 per cent, Philadelphia receipts about 34 per cent, and Baltimore receipts about 41 per cent. Of the total grain received at these four ports during the past year wheat constituted 48,923,947 bushels; corn, 24,998,090 bushels; and flour, 14,429,212 barrels.

The December receipts of live stock at four principal Atlantic seaboard cities, 780,105 head, were below like receipts for December, 1908, of 841,759 head. The receipts of sheep and hogs show smaller figures than a year ago, while those of cattle and calves—slight increases. The total live-stock receipts at the four cities for the twelve months or fifty-two weeks of the year were 9,240,748 head, compared with 9,848,519 head in 1908 and 8,782,383 head reported for the year 1907. Of the total reported 1,140,170 head were cattle, 4,037,101 head hogs, 3,418,574 head sheep, and 644,903 head calves. The number of calves and sheep received during the year shows increases over like receipts in 1908 and 1907. The number of cattle received shows a slight decrease as compared with the like annual receipts for the last two years; the largest reduction is shown by the figures of hogs, the lowest on record since 1903.

LEADING LUMBER MOVEMENTS DURING 1909.

Figures of important lumber movements in the country during the past year show larger totals than for the preceding year. As compared, however, with the records of the earlier years the general tendency of a decline of lumber shipments from the older and more populous sections of the country is unmistakable. The centers of the lumber supply may be said to gravitate more and more toward the South, Southwest, and the Pacific slope.

The shipments for the year of pine lumber from the Mississippi and Wisconsin valleys, 1,176,694 M feet, while about 90,588 M feet in excess of the unusually low figures for the preceding year shows, however, a decline of 39 per cent as compared with the average for the five-year period, 1903 to 1907, of 1,927,283 M feet. The decline in the shipments, which may be said to have set in during the year 1907, proceeded rapidly, the figures for the past year being almost one-half of the 1905 total. A similar decline is shown in the Lake shipments of lumber of all classes, mainly from Lake Michigan and Lake Superior ports, the total for the 1909 season being about one-third below the average for the five-year period, 1903 to 1907.

The shipments during the year of yellow pine from nine Southern and Southwestern States aggregated 4,933,828 M feet, showing the largest annual total reported by the Yellow Pine Clearing House in the annals of its history. The increase for the year is due probably as much to the larger operations of the individual concerns as to the larger number of firms reporting to the clearing house. The average yearly number of these concerns has grown almost continuously from 174 in 1902 to 329 in 1907, 352 in 1908, and 381 in 1909.

The reports of the North Carolina Pine Association, which cover shipments of pine lumber from Virginia and the Carolinas, show total shipments during 1909 of 293,320 M feet, compared with 266,534 M feet for the preceding year and an average for the five-year period, 1903 to 1907, of 338,917 M feet. The high-water mark in the annual shipments reported by this association was attained in 1907 when 470,574 M feet were shipped. The principal destinations of these shipments, by water mainly, outside of the Southern States proper, were New York State, to which 49,072 M feet were consigned, Pennsylvania, and the New England States.

The movement of redwood lumber during the past year, as measured by quantities consigned to San Francisco and southern California points, aggregated 350,908 M feet, compared with 297,002 M feet in 1908 and 389,784 M feet in 1907, the largest yearly total recorded by the San Francisco lumber record bureau. The 1909 pine and fir arrivals at the same points aggregated 1,168,410 M feet, compared with 1,043,369 M feet in 1908 and 1,315,382 M feet in 1907, the year following the San Francisco earthquake. The 1909 domestic shipments of lumber from Portland, Oreg., 97,715 M feet, compared favorably with like shipments for the two preceding years, while those from Tacoma, Wash., 75,136 M feet, were over 60 per cent in excess of the corresponding 1908 total. The coastwise receipts for the year of southern pine at New York, 486,661 M feet, fell slightly below the largest annual figure of 494,704 M feet reported for 1906; as compared with the preceding year the increase in these receipts was 57 per cent. The total lumber receipts at Boston are given for the year as 307,468 M feet, of which about 15 per cent was of foreign origin, the 1909 figures being the largest annual receipts ever reported by the local chamber of commerce.

LEADING COAL MOVEMENTS DURING 1909—PRODUCTION OF COKE AND PIG IRON.

Shipments during December of anthracite coal from eastern producing territory, 5,775,438 gross tons, were below both the shipments for the preceding month as well as for December, 1908. The shipments for the year, 61,969,885 gross tons, fell below the corresponding 1907 and 1908 totals of 67,109,393 and 64,665,014 gross tons.

The December movement of bituminous coal over nine leading eastern coal-carrying roads aggregated 9,897,376 tons, compared with 8,723,793 tons reported for December, 1908. The coke movement during the month over the same roads, 2,724,064 tons, shows an even larger relative gain over the corresponding 1908 total of 1,796,030 tons. The yearly movement of bituminous coal over these same roads, 103,981,019 tons, compares favorably with the corresponding 1908 total of 93,183,945 tons. The coke movement for the year, 25,922,152 tons, shows an increase of almost 60 per cent over the corresponding 1908 total, indicating approximately the growth during the year of the demand for coke by the iron furnaces of the country. The Connellsville Courier estimates the production of coke during the fifty-two weeks ending December 25, 1909, at 17,563,574 net tons, or about 55 per cent in excess of the corresponding 1908 production. Bituminous coal shipments by water to domestic destinations during the last month of the year from five principal Atlantic seaports, 1,972,221 gross tons, were below like shipments reported for December, 1908, 2,231,049 gross tons, and the same is true of the December shipments of anthracite coal from the three anthracite-shipping ports, 1,531,552 gross tons. The record for the year 1909 indicates a total of 24,111,488 gross tons of bituminous coal shipped from these ports, compared with 23,021,019 gross tons shipped the year before. The total for 1909 does not include 163,097 tons of domestic cargo coal and fuel coal for the needs of coastwise steamers and government vessels supplied during the nine months since April, 1909, from the Sewalls Point pier of the Virginian Railway. The anthracite coal shipments from New York, Philadelphia, and Baltimore aggregated 16,655,391 gross tons, compared with 17,486,467 gross tons reported for the preceding year.

The inland water movement of coal during the year shows large gains over the 1908 volume. Thus the coal traffic of the Monongahela River during 1909 totaled 9,736,666 net tons, compared with 8,178,190 net tons in 1908. The like movement by way of Davis Island Dam totaled 2,466,710 net tons, as against 1,745,159 net tons for the preceding year, while the Kanawha River tonnage for the year aggregated 1,246,008 net tons, compared with 952,384 net tons for the year 1908. The lake domestic shipments for the year of bituminous and anthracite coal, mainly from Lake Erie ports, aggregated 13,630,900 and 3,616,063 tons, respectively. This amount is exclusive of 2,282,801 net tons, the quantity of bunker coal supplied to vessels in the domestic and foreign trades on the Great Lakes. A larger demand for industrial consumption is indicated by the increase in the receipts of soft coal at such important consuming centers as Boston and St. Louis. Thus receipts of domestic soft coal at Boston during the past year aggregated 3,511,250 tons as against 3,302,929 tons in 1908. The anthracite coal receipts at Boston for the year, 1,702,796 tons, fell below the corresponding 1908 figures of 1,776,401 tons. The total coal receipts for the year at St. Louis were 7,150,340 tons, compared with 6,890,286 tons reported for the preceding year. Coal operations in southwestern territory, as indicated by the tonnage reports of the Southwestern Interstate Coal Operators' Association, while on a larger scale than during 1908 did not, however, reach the same volume as in 1907, when the record tonnage of 14,656,338 tons was reported. Of the 1909 shipments of 12,999,376 tons about 45 per cent is credited to Kansas, less than 20 per cent to Missouri, about 19 per cent to Oklahoma, and about 16 per cent to Arkansas.

Pig-iron production during December shows the largest monthly total in the history of the trade. The annual output of pig iron, exclusive of charcoal iron, is stated by The Iron Age as 25,414,463 gross tons, compared with 15,641,537 and 25,315,387 gross tons reported for the calendar years 1908 and 1907. The favorable total for the year, as compared with the 1907 record, is due largely to the enormous increase of furnace activity during the last quarter of the year and the decreased production during November and December, 1907, following the October crisis of that year. The increased demand for iron material appears best from the comparative figures of building operations in all parts of the country (see pp. 612 and 613) and the larger orders of the railroads for locomotives and cars. Thus the number of locomotives ordered during the year was 3,350, as against 1,182 in 1908 and 3,482 in 1907. The number of freight cars ordered was 189,360, compared with 62,699 and 151,711 in 1908 and 1907, while the number of passenger cars ordered, 4,514, was larger than for any earlier year recorded.

COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY DURING 1909.

In the cotton trade the end of the calendar year marks the period when over 90 per cent of the year's crop has passed through the ginneries and a fairly accurate estimate of the season's available supply can be formed. The ginning reports of the Census Office indicate a total of 9,792,990 bales of the 1909 crop ginned to January 16 of the present year, compared with 12,666,203 and 10,339,551 bales ginned to January 16 in 1909 and 1908. The sight receipts of cotton for the four months of the present season aggregated 7,110,437 bales, compared with 8,710,839 bales received during the four months of the 1908-9 season and 6,710,766 bales received during the four months of

the 1907–8 season. As compared with the 1908–9 figures the quantities ginned during the present season show a decline of 23 per cent, while sight receipts for the same period—a decline of 18 per cent. The port receipts during the four months of the present season aggregated 5,064,057 bales, compared with 6,330,383 and 5,045,376 bales reported for the corresponding months in 1908 and 1907. Of the total for the present season 70.8 per cent is credited to the three ports of Galveston, Savannah, and New Orleans, as against 73.4 per cent for the corresponding months of the 1908 season. Receipts at Galveston and New Orleans for the present season show large declines while those at Savannah a slight increase over the corresponding 1908 totals. The takings of the American spinners for the same period totaled 2,106,683 bales, compared with 2,401,626 and 1,699,545 bales for the four months in 1908 and 1907. The quantity credited to southern mills during the present season, 952,757 bales, is only about 4,000 bales below the corresponding 1908 total, while the takings of the northern mills were about 20 per cent below the corresponding figures for the preceding season. American stocks at the end of the year are stated as 1,552,310 bales, compared with 1,948,547 and 1,569,829 bales at the end of 1908 and 1907.

Grain and flour receipts for the year at New Orleans aggregated 17,127,627 bushels, compared with 17,715,302 and 22,444,681 bushels received during 1908 and 1907. As compared with 1908 totals, the receipts of corn show a large increase, while those of wheat, flour, and oats considerable decreases. Receipts at the same city of rough rice for the five months of the current season, 1,018,984 sacks, were larger in volume than for the corresponding periods in 1908 and 1907. Shipments of clean rice for the same period, 1,346,781 pockets, show even more than proportionate increases over the corresponding figures for the two preceding seasons.

Receipts of spirits of turpentine at Savannah, Ga., for the nine months of the season beginning April 1, 165,380 barrels, were lower than during any of the seasons since 1904, and the same is true of the nine months' receipts of rosin at the same market. The total shipments from that port of spirits of turpentine, 152,454 barrels, of which 66,775 barrels were to domestic destinations, were likewise below the corresponding totals for the preceding four years. The total shipments of rosin, 523,580 barrels, of which 244,739 barrels were destined to domestic ports, while below the corresponding 1908 totals do not indicate the same relative decrease as compared with the figures for the earlier years. The stocks on hand at the end of the year were 36,788 barrels of spirits of turpentine, compared with 47,756 barrels at the end of 1908, and 152,362 barrels of rosin, compared with 169,165 barrels at the end of 1908.

LAKE COMMERCE DURING 1909.

Domestic commerce on the Great Lakes during the calendar year 1909, as measured by the volume of freight shipped between domestic ports on the Great Lakes, aggregated 80,974,605 net tons. This tonnage, while about one-third larger than for the year before, is about 2½ million tons below the like 1907 tonnage, the largest total in the history of the lake trade. The total just given does not comprise the entire volume of lake commerce, as it does not include the volume of exports to Canada nor the imports from Canada, nor the movement between Canadian ports; neither do these figures include the purely local movements within the limits of the ports proper. If the volume of these movements were included it is likely that the total lake commerce during the year would approximate, if not exceed, 90 million tons. Of the total domestic lake shipments for the year, 44,086,365 net tons are credited to ports on Lake Superior, compared with 28,253,774 net tons shipped from these ports during 1908; 14,123,780 net tons to ports on Lake Michigan, compared with 10,982,056 net tons in 1908; 1,492,930 net tons to Lake Huron ports, compared with 1,096,014 net tons in 1908; 18,704,142 net tons to Lake Erie ports, compared with 18,267,370 net tons in 1908, and 545,995 net tons to Lake Ontario ports, compared with 440,908 net tons shipped from these ports in 1908. In the case of Lake Superior and Lake Michigan ports the bulk of shipments is made up of iron ore and grain; in the case of Lake Erie ports the shipments are more diversified and include hard and soft coal, iron manufactures, and miscellaneous freight. The movement on Lake Huron is of a more local character and is made up largely of unclassed freight. The merchandise shipments on Lake Ontario consisted partly of coal and also of unclassed freight. Further analysis of the total discloses the fact that the greater part of the freight consisted of bulky and long-haul traffic. This is particularly true of the eastbound shipments of iron ore and grain and the westbound shipments of coal.

The year's iron-ore shipments by lake, as reported to the bureau, exclusive of about 400,000 gross tons exported to Canada, totaled 40,732,677 gross tons, compared with 24,939,185 gross tons in 1908 and 40,727,972 gross tons in 1907. The largest shipping ports in the order of their importance were Duluth, credited with 13,266,687 gross tons; Two Harbors, credited with 8,965,698 gross tons; Superior, credited with 6,420,095 gross tons; Escanaba, credited with 5,533,698 gross tons; Ashland, credited with 3,638,849 gross tons, and Marquette and Presque Isle, credited with 2,884,241 gross tons. Of the total iron-ore shipments 86 per cent originated at Lake Superior and 14 per cent at Lake Michigan ports. About 83 per cent of the total iron ore received was landed at Lake Erie ports, the remainder being delivered at Lake Michigan docks for consumption at local furnaces. The largest iron-ore receipts during the year, 8,056,316 gross tons, are credited to Ashtabula; Conneaut, with 6,992,056 gross tons, was second in place; the Chicago district, including the Gary and Indiana Harbor docks, received 6,678,538 gross tons; Cleveland, with 6,126,936 gross tons, and Buffalo (including the Tonawandas) with 5,009,304 gross tons, are the other districts showing yearly receipts in excess of 5,000,000 tons. The total iron-ore receipts for the year at Lake Erie ports, 33,673,469 gross tons, show a remarkable agreement with the annual figures published by The Marine Review, 33,672,825 gross tons, though the distribution of receipts by ports, as reported to the bureau, in several cases shows slight differences from the trade data.

Domestic grain shipments during the past season totaled 118,203,760 bushels, of which 56,114,633 bushels was wheat, 28,954,760 bushels corn, 17,828,717 bushels oats, 14,137,662 bushels barley, and 1,167,988 bushels rye. As compared with corresponding 1908 figures, the shipments of wheat and rye show decreases and those of other grains slight increases. Over 87 per cent of the annual wheat shipments proceeded from Duluth and Superior. The lake shipments for the past year of this article from Chicago, 5,855,300 bushels, were about one-third below the average for the preceding five years. Over 84 per cent of the domestic lake shipments of corn proceeded from Chicago, the other two ports showing quantities in excess of 1,000,000 bushels being Milwaukee and Superior. The shipments of oats were less concentrated, Manitowoc and Chicago being credited with over 55 per cent of the total shipments for the season. Over 80 per cent of the total domestic shipments of barley proceeded from Superior and Milwaukee, while the three largest shipping ports for rye were Duluth-Superior, Kewaunee, and Milwaukee. The flour shipments for the year, 1,248,891 net tons of 10 barrels each, proceeded mainly from Milwaukee, Chicago, Duluth-Superior, and Gladstone, and were likewise below those reported for the last four years.

Flaxseed shipments for the year, 9,883,432 bushels, were about 37 per cent below those reported for 1908 and proceeded practically all from Duluth-Superior.

Of the total wheat received during the year by lake from domestic sources, the Lake Erie ports, mainly Buffalo, claim over 87 per cent, while over 11 per cent was landed at Lake Michigan ports, chiefly Chicago. Of the total corn received during the year Lake Erie

ports took 70 per cent, Ogdensburg, on Lake Ontario, 15 per cent, and Lake Michigan ports, mainly Ludington, practically all the rest. Over 64 per cent of the lake receipts of oats are credited to Buffalo, the other important receiving port being Ludington, on Lake Michigan. More than half of the annual receipts of rye, about 83 per cent of the annual receipts of flaxseed, and almost two-thirds of the annual flour receipts are credited to Buffalo.

The lumber shipments for the year, 1,155,765 M feet, fell about one-third below the average five-year period, 1903 to 1907, notwithstanding the large demand for this material in the Middle West and East. Of the total lumber shipped about 54 per cent proceeded from Lake Michigan ports, about 37 per cent from Lake Superior ports, and practically all the rest from Lake Huron ports. About 54 per cent of the lumber receipts are credited to Lake Michigan ports, mainly Chicago, Ludington, and Frankfort. Lake Erie ports, among them North Tonawanda in the first place, are credited with over 41 per cent of the total receipts.

The lake movement of pig iron during the year, 136,656 net tons, proceeded mainly from Lake Michigan and Lake Superior ports, while that of iron manufactures, 680,554 net tons, proceeded chiefly from Lake Erie ports; both these movements show considerable gains over the abnormally low movements for the 1908 season. The season shipments of salt, 561,829 net tons, mainly from Lake Michigan ports, were smaller, while those of copper, 167,614 net tons, from Lakes Superior and Michigan ports, larger than a year ago. The shipments of hard coal, chiefly from Buffalo, Erie, and Oswego, 3,616,063 tons, fell 14 per cent short of the like 1908 shipments and proceeded mainly to Duluth-Superior, Milwaukee, and Chicago. The shipments of soft coal, 13,630,900 net tons, compare favorably with like shipments in 1908 of 13,204,009 net tons. About 94 per cent of those shipments originated at Lake Erie ports, chiefly at Toledo, Ashtabula, Cleveland, Lorain, and Sandusky. It is noteworthy in this connection that the average freight rates for the past year on hard coal shipped from Lake Erie ports were higher, those on soft coal lower, than during 1908. Of the total annual shipments of soft coal, over 50 per cent proceeded to Lake Superior destinations, mainly Duluth-Superior and Hancock-Houghton, while 43 per cent of these shipments were taken by Lake Michigan ports, chiefly Milwaukee, Manitowoc, and, to a smaller extent, Chicago. The totals above given do not include the quantity of bunker or fuel coal supplied to vessels for their own use. The amount of bunker coal taken during the past year by vessels in the domestic lake trade is stated as 2,021,393 net tons, while the like amount taken by vessels in the foreign trade is given as 261,408 net tons, compared with 1,477,902 net tons of bunker coal placed aboard vessels in the domestic trade and 248,731 net tons of bunker coal aboard vessels in the foreign trade during the calendar year 1908. The total quantity of fuel coal supplied to all classes of vessels (including tugs and harbor vessels) as reported by fueling concerns operating at the various lake ports during the 1909 season appears on page 600 of this Summary.

A large increase is shown in the annual movement of unclassed, chiefly package, freight, the total for 1909, 7,534,003 net tons, exceeding by far any of the previous yearly totals reported to the Bureau of Statistics.

The largest freight receipts at any of the lake ports are shown by Buffalo, which reports a total inbound freight tonnage of 9,075,929 net tons; Ashtabula with 9,024,598, Chicago with 8,539,312 net tons, Conneaut with 7,831,603, and Milwaukee with 5,610,429 net tons are the other ports which show a total inbound freight tonnage in excess of 5 million tons. The largest volume of shipments, 16,488,409 net tons, is reported by Duluth, while the other ports showing an outbound tonnage in excess of 5 million tons for the year were Two Harbors with 10,136,618 net tons, Superior with 8,749,214 net tons, and Escanaba with 6,243,752 net tons. Practically three-fourths of the total freight received and shipped by lake was handled at sixteen lake ports. For figures of domestic freight tonnage handled at the leading lake ports, see page 562.

The vessel movement between domestic lake ports, as measured by the aggregate outbound vessel tonnage, 103,271,885 net tons, was larger than for any previous year, although the number of vessel departures, 73,104, has been exceeded during each year between 1905 and 1907. The ports showing the largest outbound vessel tonnage in the domestic trade were Duluth with 9,876,735 net tons, Chicago with 7,738,547, and Milwaukee with 7,660,386 net tons register, the other ports showing an outbound tonnage in excess of 4 million tons in the order of magnitude being Buffalo, Superior, Cleveland, Ashtabula, and Two Harbors. The average size of registered craft, as calculated from the tonnage figures reported to this office for the past year, was 1,413 net tons, compared with 1,100 net tons in 1905 and 925 net tons in 1902.

The total freight tonnage which passed during the past season through the canals at Sault Ste. Marie, Mich., and Ontario, Canada, 57,895,149 net tons, was 40 per cent in excess of the like tonnage for 1908, though falling about 322,000 net tons short of the record total for 1907, owing to the smaller volume of the westbound movement through these canals. The large difference between the figures of the eastbound grain movement, as reported by the canal authorities and by this office, are due to the inclusion by the lake authorities of the quantities of grain shipped from Fort William and Port Arthur, Canada, and bound for Georgian Bay and Lake Erie ports. The quantities shipped from these two ports during the past year, as given by the Buffalo Commercial, were as follows: 56,583,103 bushels of wheat, 15,841,510 bushels of oats, 2,354,651 bushels of barley, and 3,093,627 bushels of flaxseed. About 86 per cent of the westbound freight traffic passing through the canals was made up of coal. The quantities of soft coal reported by the canal authorities are likewise larger than the quantities of soft coal reported to have been received at Lake Superior ports. These differences are explained by the fact that a part of the coal traffic through the canals is made up of coal exports from United States Lake Erie ports to Canadian ports on Lake Superior. The vessel tonnage reported by the canal authorities, 46,751,717 net tons, was larger than for any previous year, though the number of vessel passages, 19,204, for the year was smaller than during each year of 1905 to 1907. The average tonnage of registered vessels locked through the canal during the past year was 2,562 net tons, compared with 2,236 net tons in 1908, 1,473 net tons in 1902, 1,211 net tons in 1900, and 834 net tons in 1890. The total eastbound tonnage through the canals during the year, 46,379,086 net tons, is somewhat larger than the aggregate tonnage of domestic shipments from Lake Superior ports, 44,087,071 net tons, as reported to this office, as the canal figures include the eastbound freight tonnage originating at the Canadian Lake Superior ports, besides the exports from United States ports on Lake Superior to Canadian destinations, east of the Sault Ste. Marie canals. Similarly the westbound tonnage through the canals, 11,516,063 net tons, is larger than the tonnage of domestic receipts at the United States Lake Superior ports.

The freight tonnage for the year reported for the Detroit River aggregated 62,247,670 net tons, compared with 46,946,884 and 67,292,504 net tons reported for the 1908 and 1907 seasons. A 33 per cent increase of the river movement for 1909 as compared with 1908 is thus seen to correspond to a 40 per cent increase in the canal movement and a 34 per cent increase in the total lake shipments. Of the total for the year 44,404,299 net tons represented a southbound and 17,843,371 net tons a northbound movement. As against an increase of 52 per cent in the southbound movement, the northbound movement shows practically a stationary condition for the year, when compared with the preceding season. The 1909 vessel movement through the river during the past season comprised 21,531 vessels of 47,621,078 net tons register, compared with 18,212 vessels of 36,290,089 net tons register for the 1908 season and 23,721 vessels of 48,958,238 net tons register for the 1907 season.

RIVER AND CANAL TRAFFIC IN 1909.

The general improvement in the commercial and industrial situation of the country is also reflected in the more favorable figures for the year of freight and vessel movements over the inland wafers of the country when compared with the 1908 totals, though the 1909 totals as a rule are below those for 1907. Upstream traffic at Lock No. 3 on the Monongahela River, representing the maximum downstream movement on that stream, and composed mainly of bituminous coal aggregated 9,246,556 net tons, compared with 7,671,283 net tons in 1908 and 10,280,265 net tons in 1907. The upstream traffic for the year passing Lock No. 1, representing the maximum upstream movement on that river, and composed mainly of sand and gravel, totaled 1,542,810 net tons, compared with 1,271,060 net tons in 1908 and 1,650,051 net tons in 1907. Of the total tonnage 95,292 net tons was made up of iron and steel products, the quantity for the past year being more than double that carried during either of the two preceding years. The river traffic in either direction by way of Davis Island Dam during the year aggregated 3,819,705 net tons, compared with 3,060,098 net tons the year before and 4,021,896 net tons in 1907. The river traffic on the Kanawha River, as measured at Lock No. 11, amounted to 1,280,087 net tons, exceeding in volume the traffic of the year before, but falling 26 per cent below the 1907 record. The yearly figures of traffic for the Green River (Kentucky), as measured at Lock No. 1, 307,157 net tons, were below the corresponding totals for the preceding two years. The arrivals by river during the year at Cairo, Ill., at the confluence of the Mississippi and Ohio rivers, totaled 6,722 vessels of 3,930,177 net tons, this being the smallest yearly total since 1904. The 1909 traffic figures for the New York State canals, 3,116,536 net tons, while slightly larger than the figures for the preceding year show a gradual decline since the earlier years. The quantity of grain and flour carried on these canals in 1909, 420,125 net tons, constitutes about one-third of the quantity carried in 1890. The figures for the Erie Canal, 2,031,307 net tons, owing in part to the earlier closing of navigation, were lower than those for the preceding three years. The 1909 receipts and shipments by the Erie Canal at Buffalo, 629,271 and 899,571 net tons, respectively, were below corresponding figures for the two preceding years. Of the total 1909 canal shipments at Buffalo 16,407,259 bushels was grain, as against 14,404,164 bushels shipped by that route during the preceding year. The relative importance of grain shipments by canal from Buffalo is growing in the proportion as the eastbound rail shipments of grain from that city decrease.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-four different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

[a] As reported by the Indianapolis Board of Trade.

GRAIN MOVEMENT AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business; i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE OF THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of December and twelve months ending with December. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of December transactions at 87 ports of receipt and 111 ports of shipment were reported. The number of vessels arriving in December was 3,055, and the departures numbered 2,653 vessels. The registered tonnage for the month was as follows: Arrivals, 3,858,812 net tons; departures, 2,865,000 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, DECEMBER AND TWELVE MONTHS ENDING DECEMBER, 1907–1909.

A summary of the lake traffic for December, compared with the corresponding months in 1907 and 1908, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. December receipts in 1909 at all ports reporting were 3,419,102 net tons compared with 2,111,015 net tons in December, 1908, and 2,419,801 net tons in December, 1907. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

[a] Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at various lake ports, see page 1134.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

RECEIPTS AND SHIPMENTS AT MINOR LAKE PORTS FOR THE MONTH OF DECEMBER, 1909.

The receipts and shipments at minor lake ports for December, 1909, show 50 different receiving ports and 73 different shipping ports. These, together with the 37 ports of receipt and 38 ports of shipment in the detailed statement, make 87 ports of receipt and 111 ports of shipment reported during December.

The receipts consisted of hard coal, 14,088 net tons; soft coal, 12,068 net tons; salt, 229 net tons; lumber, 2,320,000 feet; oats, 400 bushels; barley, 176,000 bushels; and unclassed freight, 28,405 net tons. These receipts reduced to net tons make a total of 63,660.

The shipments were: Iron ore, 5,707 gross tons; pig iron, 1,500 gross tons; iron manufactures, 20 net tons; soft coal, 3,112 net tons; bunker coal, 2,186 net tons; salt, 1,331 net tons; copper, 500 net tons; lumber, 13,218,000 feet; and unclassed freight, 82,207 net tons. These shipments reduced to net tons make a total of 123,864.

[a] Includes tonnage of vessels carrying in-transit goods between Canadian and United States ports.
[b] Beginning with the year 1906, the ferry movement between Ashland and Washburn was treated as one round trip per month during the season of navigation.

COMMERCE THROUGH THE SAULT STE. MARIE AND OTHER LAKE CANALS.

The United States engineer in charge of the Sault Ste. Marie Canal, Michigan, reports that the United States canal was opened on April 20, 1909, 7 days earlier than in 1908, and that the Canadian canal was opened on April 21, 1909, the same date as in 1908. The United States canal was closed on December 11, 1909, allowing an open season of 236 days. The Canadian canal remained open 5 days longer, or to December 16, and, as it opened one day later, the season at this lock lasted 240 days. These waterways are the connecting links between the lower lakes and Lake Superior. Commerce and travel passing here consists primarily of through business. Passenger traffic is about equally divided in both directions; it amounted to 59,948 persons in 1909, 53,287 persons in 1908, and 62,758 persons in 1907.

Through freight westward by these passenger lines consists prominently of what is known as "package freight," or general merchandise for distribution at and through upper lake ports. These boats carry eastward large quantities of flour in barrels from upper lake and northwestern mills.

Westbound cargo freight consists chiefly of coal, this commodity comprising 86 per cent of the total westward traffic this season. Eastward cargo freight includes iron ore as the principal item, and flour, grain, and lumber.

LAKE IN-TRANSIT MOVEMENT OF MERCHANDISE DURING 1908 AND 1909.

The following table presents the annual figures of the movement of freight, in bond, destined to or shipped from domestic ports on the Great Lakes, but passing through Canadian territory in order to reach its destination.

It will be noted that the figures of shipments are considerably in excess of the figures of receipts. This is due largely to the fact that eastbound bonded grain shipments from Chicago are relatively very heavy. This tonnage enters Canada at points on Georgian Bay, is transferred to the Canada Atlantic or Grand Trunk railways, and again enters the United States at northern New York or Vermont points.

There were received at the United States lake ports from these sources 79,654 net tons of freight in 1909, as against 68,985 net tons in 1908. Shipments from these ports through Canadian territory amounted to 248,008 net tons in 1909 in comparison with 172,224 net tons in 1908.

While the figures of the lake in-transit movement are included in those found in the tables representing the domestic commerce on the Great Lakes, they are believed to contain enough individual significance to deserve a separate tabulation.

[a] The above figures are exclusive of bunker coal supplied to harbor vessels. [b] Anthracite coal strike. [c] Figures not available.

NOTE.—The above table shows coal carried by vessels between domestic ports on the Great Lakes only; figures of fuel coal supplied to lake vessels in the foreign trade have been compiled and are shown in the footnote on page 1114.

III.—COMMERCIAL MOVEMENTS AT THE NORTH ATLANTIC SEABOARD.

The territory covered by these movements includes the Atlantic coast south as far as Baltimore, Md. The operations reported include the receipts and shipments of live stock, flour, and grain for December and twelve months at the North Atlantic ports of Boston, New York, Philadelphia, and Baltimore, miscellaneous receipts at New York, and tobacco receipts and stocks at principal eastern markets.

Shipments of boots and shoes from Boston, as reported by the Shoe and Leather Reporter, of Boston, Mass., for the five weeks ending January 2, 1910, amounted to 363,148 cases, against 399,678 cases for five weeks in 1908. For the fifty-two weeks ending January 2, 1909, the shipments amounted to 4,237,751 cases, against 3,774,013 cases for the fifty-two weeks of 1908.

Fresh fish to the amount of 5,636,550 pounds were received at Boston during December, 1909, as compared with 6,213,350 pounds in December, 1908. At Gloucester the 1909 arrivals of fresh fish amounted to 878,220 pounds, and of salted fish 7,044,604 pounds. For December, 1908, corresponding totals were 2,127,975 pounds of fresh fish and 4,692,443 pounds of salted fish. The principal kinds received were cod, cusk, haddock, hake, pollock, herring, and halibut.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during December and twelve months ending December, 1907, 1908, and 1909. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section XI.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous.

[a] Including quantities reported by the various railroads and coal companies as destined for the use of vessels in the domestic trade.
[b] The coastwise shipments of coal from Norfolk are exclusive of quantities shipped by the Virginian Railway at Sewalls Point, Va. According to the report of that company, 34,846 tons of coal were dumped over the pier of the Virginian Railway at Sewalls Point during December, and 241,644 tons during the period from April to December, 1909, inclusive. For table showing details of this movement, see page 1162. These totals include bunker coal supplied to vessels both in the foreign and domestic trades.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years, to the end of December. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VIII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the eleven months ending December 31, 1909, of the vessels reported 1,984 were loaded with coal; 377 carried lumber, logs, piling, and wood; 107 carried ties; 571 carried merchandise; 52, rocks; 12, brick; 19, steel; 1, iron rails; 8, staves; 15, wire and nails; 2, cotton ties; 1, drainpipe; 4, wheat; and 1, sugar.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 39,967 net tons mined in the first and second pools during December, makes a total coal traffic of 836,567 net tons for the river during December. Of other downstream freight, 2,686 tons of miscellaneous merchandise are to be added, making a total of 839,253 net tons in December. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For twelve months ending with December the total movement was 11,456,392 net tons in 1909, 9,578,473 net tons in 1908, and 12,709,025 net tons in 1907. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in December amounted to 101,394 net tons.

The total freight moved in both directions on this basis of calculation was 940,647 net tons in December, 1909, as against 740,580 net tons in December, 1908, and 1,103,377 net tons in December, 1907.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

The following table shows the quantity of bunker coal supplied to all classes of vessels at lake ports during the past calendar year, as compared with figures for the preceding three years. These data were compiled from the individual reports to this Bureau of concerns engaged in bunkering operations during those years. Data for some of the ports are incomplete for the reason that a number of firms have

failed to supply the Bureau with the desired information. A comparison of the figures as given in the table below with the bunker coal figures collected by the Bureau through official agencies reveals large differences in favor of the trade figures, which are accounted for by the fact that the Bureau figures do not include the quantities of coal supplied to vessels in the harbor and neighborhood trades, nor to Canadian vessels in the Canadian home trade. Taken as a whole the concerns applied to have furnished full information regarding their operations for the past year; in a number of instances, however, reports could not be obtained. Rather than estimate the quantities for the respective ports the partial totals are given with notes indicating that the data for the respective ports are incomplete.

FUEL CONSUMPTION BY STEAMERS ON THE GREAT LAKES DURING THE CALENDAR YEARS 1906–1909.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.
